-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address--

All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1. ☒ This communication is responsive to 03/08/2002.
2. ☒ The allowed claim(s) is/are 1-17.
3. ☒ The drawings filed on 08 March 2002 are accepted by the Examiner.
4. ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

### DETAILED ACTION

This application has been examined.

Claims 1-17 are presented for examination.

### *Drawings*

The Examiner contends that the drawings submitted on 03/08/2002 are acceptable for the examination proceedings.

### ✓ *Reasons for Allowance*

Claim 1-17 are allowed.

The following is an examiner's statement of reasons for allowance:

In regards to claims 1 & 9, the closest prior art does not disclose receiving values for respective picture elements of the image; generating dark pixel data identifying picture elements of the image having a low luminance relative to other picture elements thereof; analyzing only the dark pixel data to generate a signal indicating the likelihood that the image is a cartoon.

The closest prior art discloses a system for detecting the edge of elements within a digital image. The edge detection allows to discover the difference in color patterns from one element to another element. The system does not discover the dark pixel around an image element. The examiner determined a system that allows a digital image to be converted into drawn cartoon. The system searched for edges within the digital image to change edges into dark pixel edges, like a figure around a cartoon, but does not search to predict the probability that the image is a cartoon.

The examiner understands the method of the patent application uses the dark pixels, and compares the lower luminance value of the element to other elements on the cartoon drawing. By increasing the luminance values a regular digital picture will fade evenly, while in a cartoon image, the dark pixel around the element will display the figure of the element, this how the system determines if the dark pixel around the element is a cartoon.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
